RB-33VS Conveyor Bun Toaster

For fast efficient bun toasting!

Model RB-33VS Shown

Toasts up to 1,100 bun halves/hour

Thanks to its quick heating elements and conveyor design, the RB-33VS can deliver amazingly high product volume. The RB-33VS features a variable conveyor speed control for added convenience. It enables products other than buns, that require a longer or shorter toasting time, to be finished with one pass through the conveyor.

Built-in versatility

The 11-inch wide conveyor belt enables three, 3.5-inch bun halves or two, 5-inch bun halves to be toasted side by side. English muffins, French bread and bagels too! Compact dimensions allow easy placement in snug kitchens.

Easy operation – maintenance free

All controls are in one convenient location: once they are set for desired results, operation is virtually automatic. Stainless steel construction, long lasting sheathed heating elements, permanently lubricated motor and famous Savory quality make bun toasting carefree.

Productivity information

(depending upon voltage and bread dryness)

- ***RB-33VS** – up to 1,100 halves/hour*
